

The Easiest,  
Most Efficient,  
And Cost-Effective  
Way To **Cool Your  
Grow Room  
And Save  
Money** on Electricity  
And A/C Bills!

ice  
flow®

1/2" inlets & outlets

Choice of  
6" or 8" duct flanges

Hydrophilic  
coated fins

**Works Even Better If You Have  
A Huge Room With Dozens Of  
Lights Or Plan To Get More Soon!**

The Ice Flow's® construction is nothing short of an **engineering miracle!** It has a copper heat exchanger with a molded plastic housing.

Air from your room is pulled through your reflector just as it is now, and then over the Ice Flow® heat exchanger before exiting right back into the room. **Cold water is circulated** through the unit, which is what sucks the heat from the air so efficiently before it exits back into your room.

**Introducing!**  
The World's Most Efficient Water Cooling System

→ Purchase the Ice Flow® from an Advanced Nutrients dealer, or your favorite hydroponics store
