

# How These Growers Are Cheating Their Way To Monster Yields!

*There's an organic bloom booster you can buy in almost any hydro store that's like using a video game cheat code in your garden.*

*It's a short-cut to getting a maximum performance, aroma and flavor from your plants. And because this organic bloom-booster is all natural, we decided to call it*

It was created by the best team of plant scientists money can buy, who only work on the specific types of plants you grow. Here's what they came up with:

**The Two Main "Cheats" in this organic Bloom Biostimulant.**

## **1. Volcanic Ash:**

A Super-potent ingredient which contains virtually every element on planet Earth is the first "cheat".

## **2. Leonardite:**

The second is an ancient volcanic rock called "leonardite" that is one of the most mineral-rich substances known to man.

Get your bottle now and risk nothing.

If you're not thrilled with the improvement in taste and quality of your yields, return with proof of purchase for a full and immediate refund.

# NIRVANA

### Read what growers are saying about Nirvana

**Quincy T., Athens, Georgia** "Before I was using Nirvana I was kind of resigned thinking that the price of staying organic was that I lost some harvest weight. But I gave Nirvana a try. I used it as a foliar spray about 3 weeks before I went to flowering and as a root feed after that. You could see the difference right away. The flowers are bigger and they have a sweeter taste!"

**Kali, Truchas, New Mexico** "What I found is that it works good at protecting crops not just growing them. That's all there is to it. That's different than what I thought when I started, and it's another reason to use it."

**Aaron Heineken Green** "Hey guys, just thought I'd say, I'm just starting to use your Nirvana in my hydro system, and I gotta say...it's doing great. My plants enjoy it alot. Lots of thanks. Will continue to use your Nirvana nutrients in the future."

➔ **To see what your garden looks like when grown with organic "cheats", visit your local hydroponic store today and ask for Nirvana from Advanced Nutrients.**
