Finally You've Got The Calcium, Magnesium Supplement That Has It All

Reports to our community from "growers" just like you reveal that base nutrients are failing to provide you with enough calcium and magnesium, especially when using reverse osmosis (R.O.) water. Plus, it's a known fact that coco coir holds onto calcium and magnesium creating shortages for your plants. On top of that your plants use different amount of calcium and magnesium during their veg and bloom cycles. Unfortunately, other calmag supplements don't address this critical difference. And to make matters worse, are very simpleton formulas. Just read their labels and see their extremely short list of ingredients, then read SensiCal's Grow label and you'll see for yourself the list of multiple chelated nutrients which means more availability for you when using coco coir or R.O. water. **ATTENTION: If you're using Advanced Nutrients base nutrients you won't need this product.**

SensiCal Grow has been specially designed for use with all hydroponics, sphagnum, coco coir and soil growing mediums. SensiCal Grow has been developed for use with any and all hydroponics, aeroponic, drip irrigation, NFT, flood & drain, drip emitters and continuous liquid feed growing systems.
